

Flight Options “Nextant” 400XT *(preliminary data)*

Midsize Cabin Category

Comparable NetJets Models: H400XP

Overall Cabin Length: 15.60 ft.

High Speed Cruise: 511 mph

Maximum Passengers: 7 (+1 lav)

Maximum Range @ LRC: 2,300 sm w/2pax

Approximate Endurance: TBD

Baggage capacity: 53.20 ft³

- The “Nextant 400XT” is an improvement over the Hawker 400XP, primarily featuring new Williams engines, a Pro-Line Avionics package, and some aerodynamic refinements to the airframe. The Williams engines will enhance the overall range, speed, and fuel burn vs. the H400XP.
- Another important point to consider is that the 400XT modification is not supported by the OEM (Hawker-Beechcraft). Based on conversations with several industry experts, Nextant’s claim of a 50% increase in range over the H400XP is unlikely.
